

# Noé LORRET DESPRET

 [in/noe-lorret-despret](https://www.linkedin.com/in/noe-lorret-despret/)

| noe.lorretdespret@proton.me | <https://skoh.dev> | +33 6 38 38 41 38 | [SkohTV](#) 

4th-year computer science student and active open-source contributor, with a strong background in Software Development and DevOps. **Looking for a 3 month internship.**

## Skills

**Programming:** Python, Rust, C / C++, Java, JavaScript

**DevOps:** Docker / Kubernetes, AWS, Github Actions, Git & Github

**Linux:** NixOS, Bash, Virtualization, eBPF

**Languages:** French (native), English (fluent - C1)

## Experiences

### Open source

Jan 2025 - Today

Maintainer & contributor

- Maintaining 5 packages and fixed 15+ failing package builds for the [Nix package manager](#) (22.2k stars)
- Improved [bpfilter](#)'s (280+ stars) performances for large IP sets from exponential complexity to linear
- Contributed to big projects, such as [Neovim](#) (93k stars), [NanoMQ](#) (2.2k stars), [Vivify](#) (100+ stars), and more

### MTI France - Paris, France

Aug 2024

IT Engineer Intern

- Implemented storage-optimization workflow to identify and purge unused/orphans VMDK files
- Built scripts to execute PowerShell and SQL commands in guest VMs, for repeatable pipeline operations
- Automated VMware/Veeam VM management with PowerShell

## Projects

### Quantum

<https://github.com/SkohTV/quantum>

All-in-one Discord bot managing my Discord server and Youtube channel

- Implemented in asynchronous Rust, with gRPC and channels for message passing between components
- Containerized with Docker and automatically deployed on AWS via a Github Actions pipeline

### OCL-rs

<https://github.com/ISENLabs/ocl-rs>

High-performance, fault-tolerant CDN for <https://lazy.isenlabs.fr>

- Built a Rust CDN with a REST API and multithreaded image upload, storage, and compression
- Handling over 2 million monthly requests and delivering images to 250+ users across France

### rbuild

<https://github.com/SkohTV/rbuild>

Compile, run & test packages on a matrix of VPS easily

- Developed a program to ship docker images or files to user-defined machines
- Runs concurrent builds via Kubernetes/Nix/Ansible and aggregates per-host logs into one report

## Education

### UQAC - Chicoutimi, Canada

Sep 2025 - Jun 2026

Master of computer science (double diploma)

- Concentration: Software engineering
- Related coursework: Cloud infrastructures, Advanced data structures, Multi-threading & parallelism

### ISEN - Caen, France

Sep 2022 - Nov 2027

Engineering degree

- Concentration: Computer Science
- Related coursework: Low level programming (C/C++), Network and infrastructures, Full stack web development, Agile project management

## Certifications

- AWS Certified Cloud Practitioner (CLF-C02) (*in progress*)

- [GitHub Foundations](#)

- [Columbia: Learning AI Through Visualization](#)
